**CE** 3

### **Description**

Grandmother on the bottom side of this pedigree is line bred back to our great old DDA Melisa 824 cow. The maternal grandsire is from proven longevity and functional genetics also. DDA Galatea 031 is also the mother to our DDA Galatea 859 cow that was as flawless as cows can be. The DDA Banjo 1101 is full brother to our proven old DDA Sandy 404 cow. The Pinebank herd has bred for soundness and fertility for many generations. When I talk about soundness, they are the only herd in the world that guarantees against poor feet. Diamond D Angus will in the future offer that same guarantee. We are almost there now.

Note: Weaning ratio listed in catalog is incorrect.
