**Final weight** 1,075

**Hip Height** 50

**Cow Calf Ratio** 43

**Dams Udder** 2

**Dams Temp** 1

### **Description**

The sire to this great bull ran in the mountains of Wyoming for numerous years. He was in elevations of over 8000 feet and did very well. He had flawless feet and that were never touched. He was very much a survivor. Unfortunately he froze his scrotal and he came back home about 3 years ago to live out his final days. We have brutal wind chill factors that we deal with here in northern Montana. I see a ton of good in this great pedigree; you will want to save every daughter the DDA Athabasca 25X sires.

Note: Weaning ratio listed in catalog is incorrect.

**Quantity:** 1
