

Sale Name: North Fork Angus

LOT 12 - Open Heifers

Description

These are late March and April calves. They are mostly from DDA Cooper 135U(OCC Great Plains son) and DDA AT&T 137V daughters. They are weighing 775-825#s. Most could be registered if so desired, for an extra cost of 50\$. We believe that they will make outstanding long-lasting females. They will mature out at about 1100-1250# cows in their prime. The mothers of these heifers so far are good footed, good mothers and have exceptional udders. They will not work for the rancher that likes big cows. They are bangs vaccinated and ready to breed. They have been actively cycling.

Quantity: 10
