Description

Notice Lodge of Wye doubled up in this great maternal pedigree. We have done this many times and the females have been some of our favorite young cows. Watching both the 0668 and E5H daughters mature in our herd has been exciting over the last 10 years. No question they have been some of our very favorite cows. The 1V has both 0668 and E5H up close in his pedigree. Also the mother of 1V is double bred to our Melisa 824 cow that stayed in production until she was 20 years old.
